# Main Findings

For land and property titles registered in the Land Register and classified to a geographic location, as at 31 December 2019:

- 6.0% (104,873 titles) had a proprietor address outside Scotland
- 1.4% (25,071 titles) had a proprietor address outwith the UK
- 83% of titles (20,695 titles) with a proprietor address outwith UK were private individuals
- 30% of outwith UK titles were in City of Edinburgh or Glasgow City
- 75% of outwith UK titles had a residential land use classification
- 81% of outwith UK titles were in urban areas of Scotland
- Titles outwith UK represented 2.7% of Scotland's land area

## Things you need know about this release

### What these statistics include

This release presents statistics on the country of origin of land and property owners and tenants in Scotland as at 31 December 2019 based on the supplied address of the proprietor at the time of registration with Registers of Scotland (RoS). A title is the statutory record of ownership or tenancy of a plot of land comprising the property, proprietorship, securities and burdens.

To be included in these statistics:

#### **1. The land and property title needs to be registered in the Land Register.**

There were 1.80 million registered titles in the Land Register, as at 31 December 2019, estimated to be 62% of all titles in Scotland. All titles that have been transferred for a consideration since 1 April 2003 should be in the Land Register. The majority of the remainder of titles are held in the Sasines Register, a deeds-based register which will in due course be replaced by the Land Register (planned for completion by 2024).

#### **2. The registered legal owner (or tenant under a long-term commercial lease, or at least one owner or tenant, if there is more than one) has provided an address at the time of registration that is able to be classified to a geographic location.**

The two most significant reasons for not having an identifiable proprietor address occur when: ownership/tenancy is by a Scottish or UK public body and no designation address is required; and when the supplied address does not include an entry in any of the town/county/country fields that enables the identification of a geographic location.

Figure 1 shows the statistics in scope compared with the approximate number of titles in Scotland. Of the 1.80 million registered titles in the Land Register, 1.75 million titles were registered titles with a proprietor address and classified to a geographic location.

## Figure 1: Statistics in scope compared with approximate total number of titles in Scotland

Number of addresses in Scotland: **2,891,000 (approximate total number of titles)**

Registered titles in Land Register as at 31 December 2019: **1,799,483**  
(estimated 62% of all titles in Scotland with remainder held in the Sasines Register)

## Main changes since last release in March 2019

This release includes new analysis looking at land use classification, urban rural classification and area of titles with a proprietor address outwith the UK.

## What you can and can't conclude

The statistics are presented as a snapshot of the Land Register as at 31 December 2019 without comparisons with previous years. Annual comparisons in terms of year-on-year changes in the statistics are not advised because the Land Register is a live database with changes occurring between annual snapshots as well as the steady progression of completing the Land Register (registering titles for the first time in the Land Register) and data quality improvements.

The address used is as given by the proprietor at the time of registration but it is possible that the proprietor has subsequently moved. The statistics will include titles where the owner has remained located outside of Scotland after the title has been purchased, for example, the purchase of land or property by a company or investor based outside of Scotland. Also included will be titles where the owner has subsequently located to Scotland after completion of the transaction, for example, where a purchaser from outside Scotland has moved into their residential property after the transaction has been completed (see background section for further information).

# Location of proprietor address

Of the 1.75 million registered titles in the Land Register as at 31 December 2019 with a proprietor address and classified to a geographic location, 6.0% (104,873 titles) of titles had a proprietor with an address outside Scotland. Therefore, 94.0% (1.64 million titles) had a proprietor with a Scottish address. The non-Scotland proprietor addresses were located as follows (see table 1):

- 4.3% (74,216 titles) were in England
- 0.1% (1,825 titles) were in Wales
- 0.2 % (3,761 titles) were in Northern Ireland
- 1.4% (25,071 titles) were outwith UK

**Table 1: Location of proprietor address for registered Land Register titles as at 31 December 2019**

	Number of titles	Percentage of all classified titles	Percentage of total registered LR titles
<b>Scotland</b>	<b>1,641,232</b>	<b>94.0</b>	<b>91.2</b>
England	74,216	4.3	4.1
Wales	1,825	0.1	0.1
Northern Ireland	3,761	0.2	0.2
Outwith UK	25,071	1.4	1.4
<b>Non-Scotland</b>	<b>104,873</b>	<b>6.0</b>	<b>5.8</b>
<b>All registered LR titles classified to a geographic location</b>	<b>1,746,105</b>	<b>100.0</b>	<b>97.0</b>
Proprietor address unable to be classified	53,378		3.0
<b>Total registered titles in Land Register</b>	<b>1,799,483</b>		<b>100.0</b>

The remainder of this release will focus on the 25,071 titles with a proprietor address outwith the UK. A reference to “outwith UK” means those titles where the supplied proprietor’s address at time of registration was outside the UK.

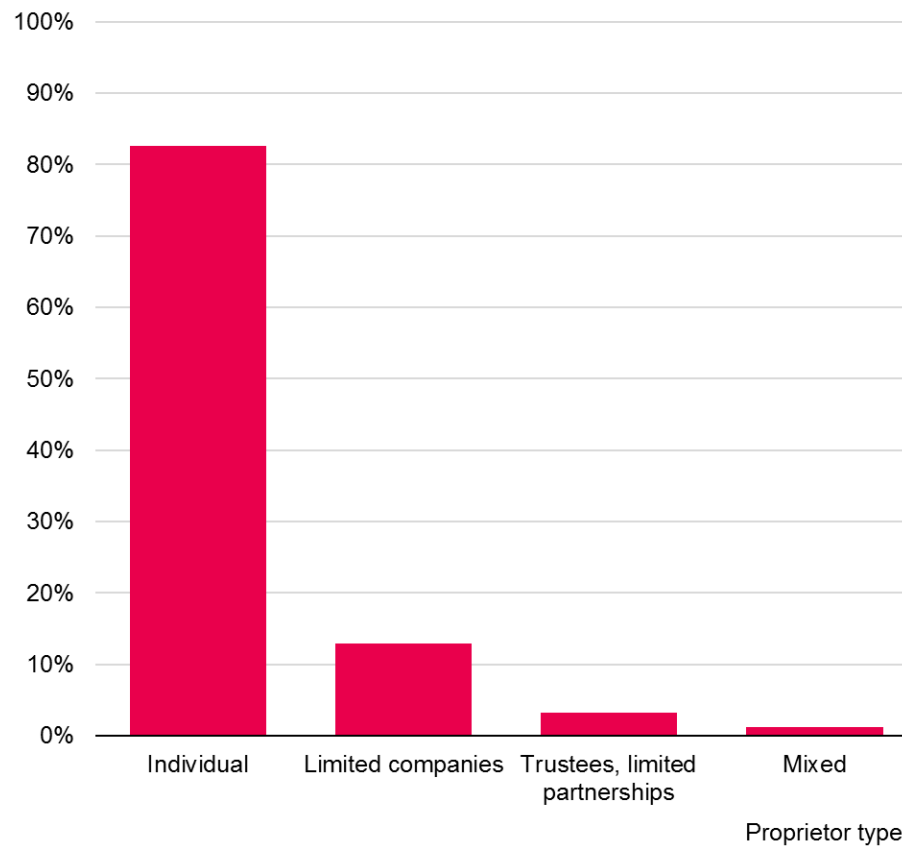

## Titles outwith UK by type of proprietor

The majority (83% or 20,695 titles) of titles with a proprietor address outwith the UK were individuals (i.e. one of more natural persons), as shown in chart 1. It is not possible to determine whether the reasons for owning/leasing property or land in Scotland is due to the intention to immigrate, or for other purposes such as second/holiday homes, accommodation for family members studying/working in Scotland, or as investments.

## Chart 1: The proprietor in around four out of every five outwith UK titles was an individual

Percentage of titles with proprietor address outwith UK by type of proprietor as at 31 December 2019

Percentage of titles with proprietor address outwith UK

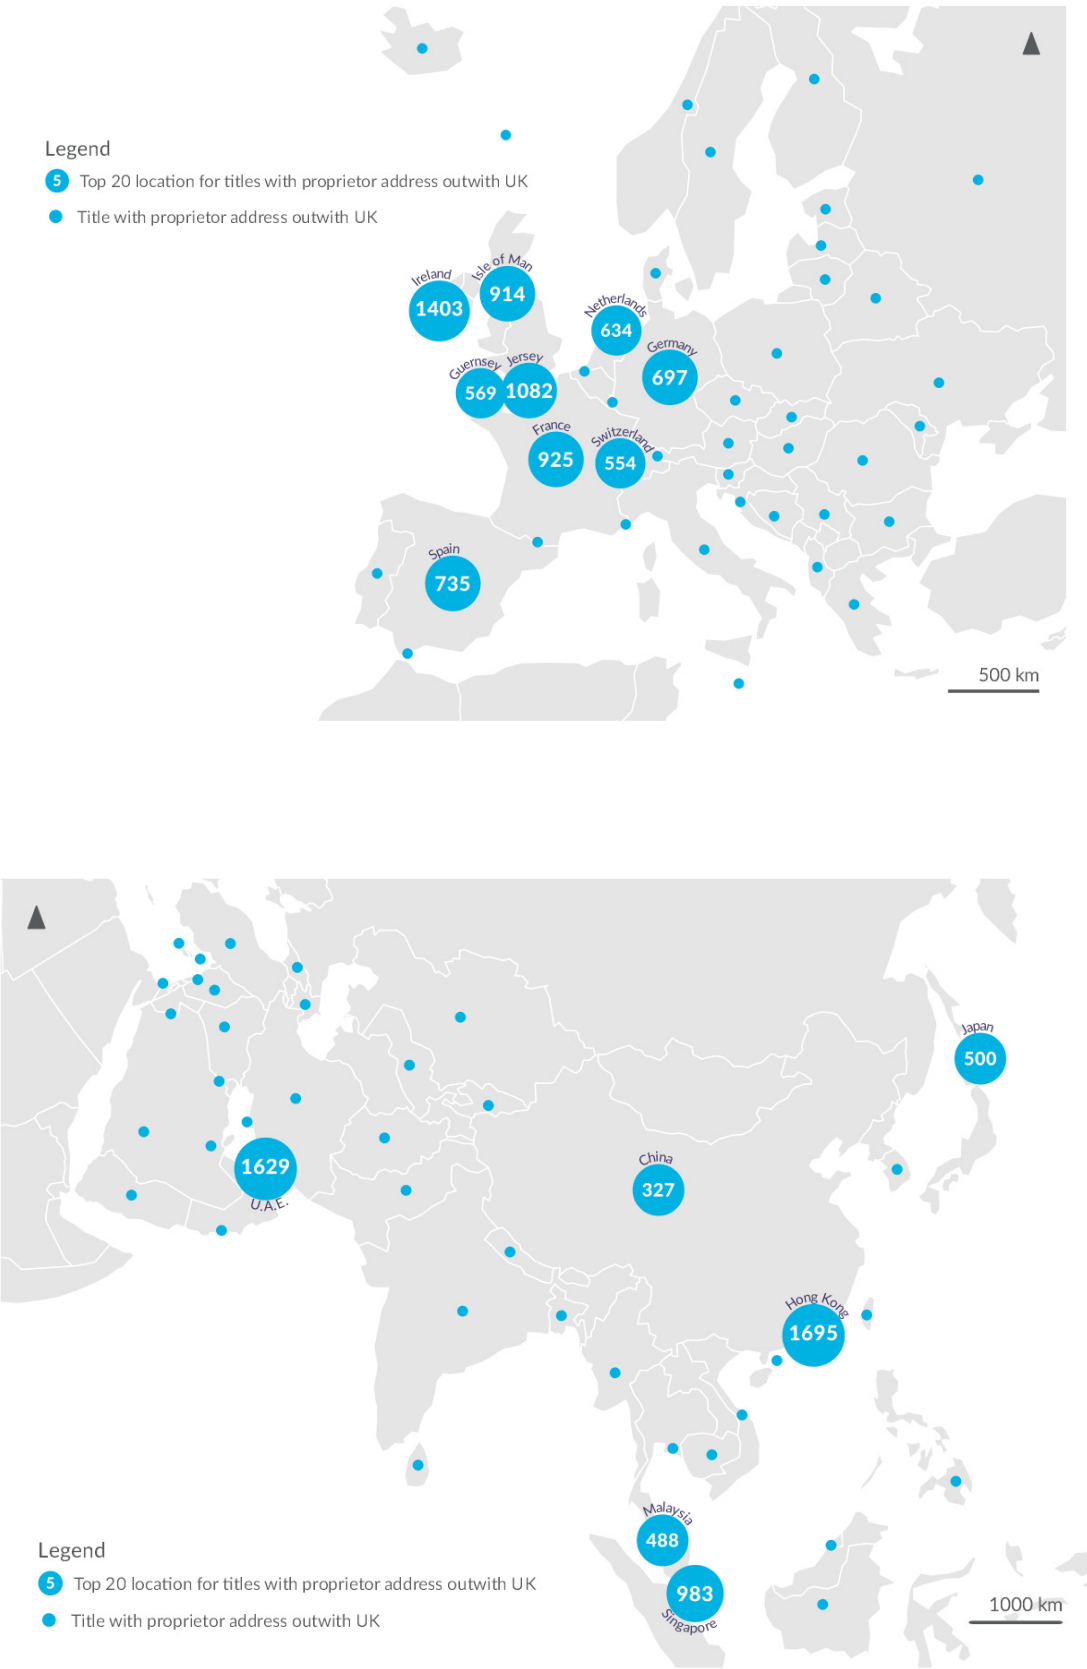

Limited companies was the proprietor type in 13% (or 3,237) of outwith UK titles. Trustees and limited partnerships accounted for 3.3% (825 titles) and 1.3% (314 titles) had a combination of proprietor types.

Individuals accounted for at least 80% of outwith UK titles in 16 of the top 20 outwith UK locations (country, Crown dependency or overseas territory). Limited companies was the majority proprietor type in the remainder of the top 20 locations (Jersey, Isle of Man, Guernsey and British Virgin Islands). More than half (62%) of all titles owned or leased by companies from outwith the UK were accounted by these locations. Almost all titles owned or leased with proprietors from the British Virgin Islands, for example, related to limited companies (94%).

Figure 2 highlights some of the top 20 locations of proprietor addresses for outwith UK titles in Europe and Asia. Overall, addresses were classified to 162 locations, excluding the UK (see table 2 in the online spreadsheet tables for further information).

Figure 2: Titles with proprietor address outwith UK in Europe and Asia as at 31 December 2019

# Titles outwith UK by interest

Ownership was the predominant interest for titles with an outwith UK proprietor address, accounting for 89% (22,327) of titles. Chart 2 shows that the remainder of these titles were leased (long-term commercial leases), with tenancy relating to 11% (2,721) of titles.

## Chart 2: Leases accounted for around one out of every ten outwith UK titles<sup>1</sup>

Percentage of titles with proprietor address outwith UK by interest as at 31 December 2019

There was not much variation in these proportions when interest in titles is examined by the type of proprietor. Ownership accounted for a slightly lower proportion of titles related to trustees and limited partnerships (85%) and a slightly higher proportion of titles related to limited companies (90%), as shown in table 2.

**Table 2: Number of titles with proprietor address outwith UK by interest and type of proprietor as at 31 December 2019**

Proprietor type	Ownership	Tenancy	Unclassified	All interests
Individual	18,428	2,254	13	20,695
Limited companies	2,915	315	7	3,237
Trustees, limited partnership	696	127	2	825
Mixed	288	25	1	314
All proprietor types	22,327	2,721	23	25,071

<sup>1</sup> 23 titles could not be classified to an interest (ownership or tenancy) and are not included in this chart.

# Titles outwith UK by local authority

Chart 3 shows where titles outwith the UK were located in Scotland.

## Chart 3: Around one in three outwith UK titles were in the City of Edinburgh or Glasgow City<sup>2</sup>

Number of titles with proprietor address outwith UK by interest and local authority as at 31 December 2019

All four of the city-based local authorities (City of Edinburgh, Glasgow City, Aberdeen City and Dundee City) were included in the top ten local authorities by number of outwith UK titles.

Around one in ten outwith UK titles (12% or 2,911 titles) were located within Renfrewshire. Of all titles with a tenancy interest, 87% (or 2,355 titles) were within Renfrewshire. If Renfrewshire was excluded, the average proportion of tenancy interest across the other 31 local authorities was 1.7% compared with 11% across the whole of Scotland. It is likely that a contributory factor for this is the number of titles of parking spaces and storage facilities near to Glasgow Airport.

<sup>2</sup> 23 titles could not be classified to an interest (ownership or tenancy) and are not included in this chart.

Table 3 shows the top 10 postcode sectors across Scotland by number of outwith UK titles. The top three postcode sectors were all within Renfrewshire and accounted for the vast majority (76%)<sup>3</sup> of titles owned or leased from outwith the UK within the local authority.

**Table 3: Top 10 postcode sectors by number of titles with proprietor address outwith UK as at 31 December 2019**

Rank	Postcode sector	Post town	Local authority	Number of titles
1	PA3 1	Paisley	Renfrewshire	909
2	PA3 3	Paisley	Renfrewshire	669
3	PA1 2	Paisley	Renfrewshire	630
4	EH3 9	Edinburgh	City of Edinburgh	446
5	PA3 2	Paisley	Renfrewshire	289
6	KY16 9	St Andrews	Fife	219
7	EH3 6	Edinburgh	City of Edinburgh	207
8	EH9 1	Edinburgh	City of Edinburgh	203
9	EH7 5	Edinburgh	City of Edinburgh	191
10	G1 1	Glasgow	Glasgow City	174

## Titles outwith UK by land use classification

RoS records six land use classes: residential, commercial, land, agriculture, forestry and other. The land use classification is provided by the submitting agent on the RoS application form when an application for registration is submitted (see background section for further information on land use classification).

The majority (75%) of outwith UK titles had a residential land use classification with 12% classed as commercial and 3.3% as land (see chart 4).

**Chart 4: Three quarters of outwith UK titles had a residential land use classification**

Number of titles with proprietor address outwith UK by land use classification as at 31 December 2019

<sup>3</sup> Total number of titles in Renfrewshire with proprietor address outwith the UK was 2,911.

Chart 5 shows the number of outwith UK titles by land use classification and local authority. Residential land use accounted for at least 70% of outwith UK titles in 31 out of 32 local authorities.

The local authority where this was not the case was Renfrewshire. In Renfrewshire, 17% of titles with proprietors that had an address outside the UK were classed as residential. The majority of titles (58%) were classed as other, the classification used for car parking spaces.

## Chart 5: Residential land use accounted for at least 70% of the land use classification of titles outwith the UK in 31 out of 32 local authorities

Percentage of titles with proprietor address outwith UK by local authority and land use classification as at 31 December 2019

# Titles outwith UK by urban rural classification

The Scottish Government urban rural classification 2016<sup>4</sup> was attached to all titles with a proprietor address outwith the UK using the 2-fold classification (see background section for further information).

For titles with a proprietor address outwith the UK, 81% were in urban areas of Scotland and 19% were in rural areas (see chart 6). For context<sup>5</sup>, in terms of land area, urban areas account for 2.2% of Scotland and rural areas account for 97.8%. In terms of population, urban areas account for 83% and rural areas account for 17%.

## Chart 6: Around four out of five titles with a proprietor address outwith UK were in urban areas of Scotland

Percentage of titles with proprietor address outwith UK by 2-fold urban rural classification as at 31 December 2019

Chart 7 shows for each local authority, the percentage of land area that is urban and compares with the percentage of outwith UK titles that are in urban areas based on the 2-fold urban rural classification.

Glasgow City and Dundee City have a high land area percentage that is urban (87% and 83% urban respectively) and the focus of outwith UK titles within these local authorities is in urban areas (99% of titles in urban areas in both local authorities). The percentage of land area that is urban is relatively lower in City of Edinburgh and Aberdeen City (51% and 46% urban respectively) but outwith UK titles remain nearly all in urban areas (99% and 98%).

The chart shows that for local authorities with a lower percentage of urban land area (between 15% and 30%) the percentage of outwith UK titles in urban areas remains high (between 86% and 99%). Clackmannanshire can be seen to be an outlier given the percentage of its land area that is urban but likely due to the low number of outwith UK titles (and titles overall) involved.

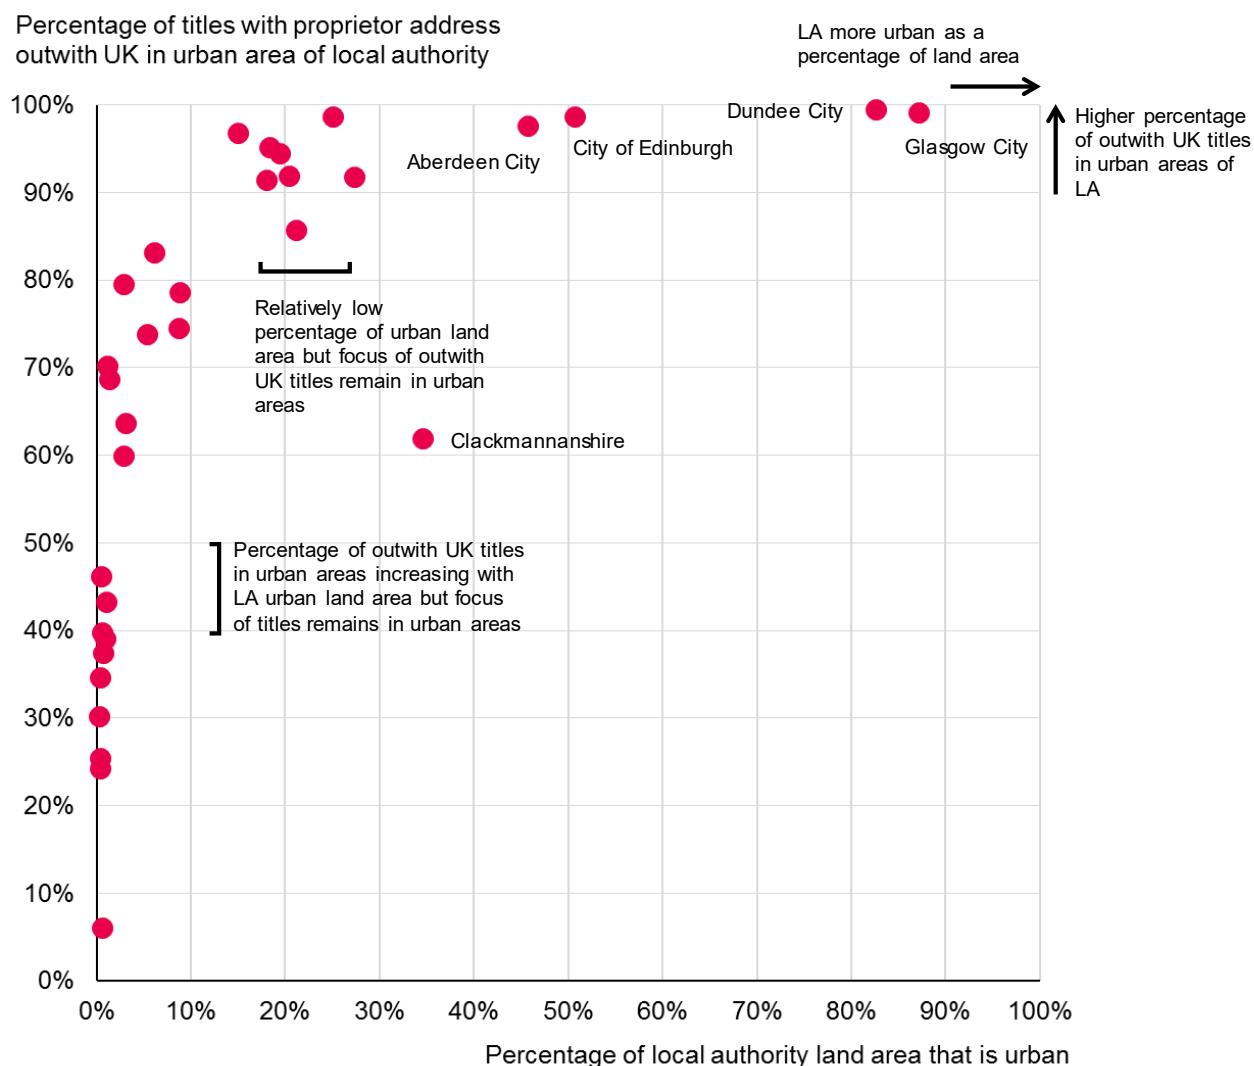

It is only below 10% of land area that is urban that there is some sort of linear relationship, with the percentage of outwith UK titles increasing as urban land area percentage increases. However, the focus of outwith UK titles in local authorities remains in urban areas, for example, Fife has a 9% urban land area with 79% of outwith UK titles located in urban areas.

<sup>5</sup> Scottish Government <https://www2.gov.scot/Publications/2018/03/6040/downloads>

## Chart 7: Focus of outwith UK titles is in urban areas

Percentage of local authority land area that is urban (SG UR 2-fold 2016) compared with percentage of titles with proprietor address outwith UK in urban area of local authority as at 31 December 2019

## Titles outwith UK by area

### Experimental statistics: data being developed

This section looks at the area of Scotland represented by outwith UK titles. The statistics presented in this section have been classed as 'experimental'.

Experimental statistics are a type of official statistic that are undergoing development and have been published to involve users and stakeholders in their development, and to build in quality and understanding at an early stage.

The area of each outwith UK title is calculated using RoS Geographic Information System (GIS) instead of the area information submitted during the registration process. The title polygons were retrieved for each outwith UK title and dissolved/aggregated the area extent by local authority to calculate area totals for each local authority as at 31 December 2019. The area referred to relate to all polygons (including those that are generated through rights) associated with the title rather than just ownership only. A title could include a bundle of rights, not just ownership rights but also other rights such as access rights. Further information on experimental statistics, the methodology used and the development of this output is available in the background section.

## Analysis

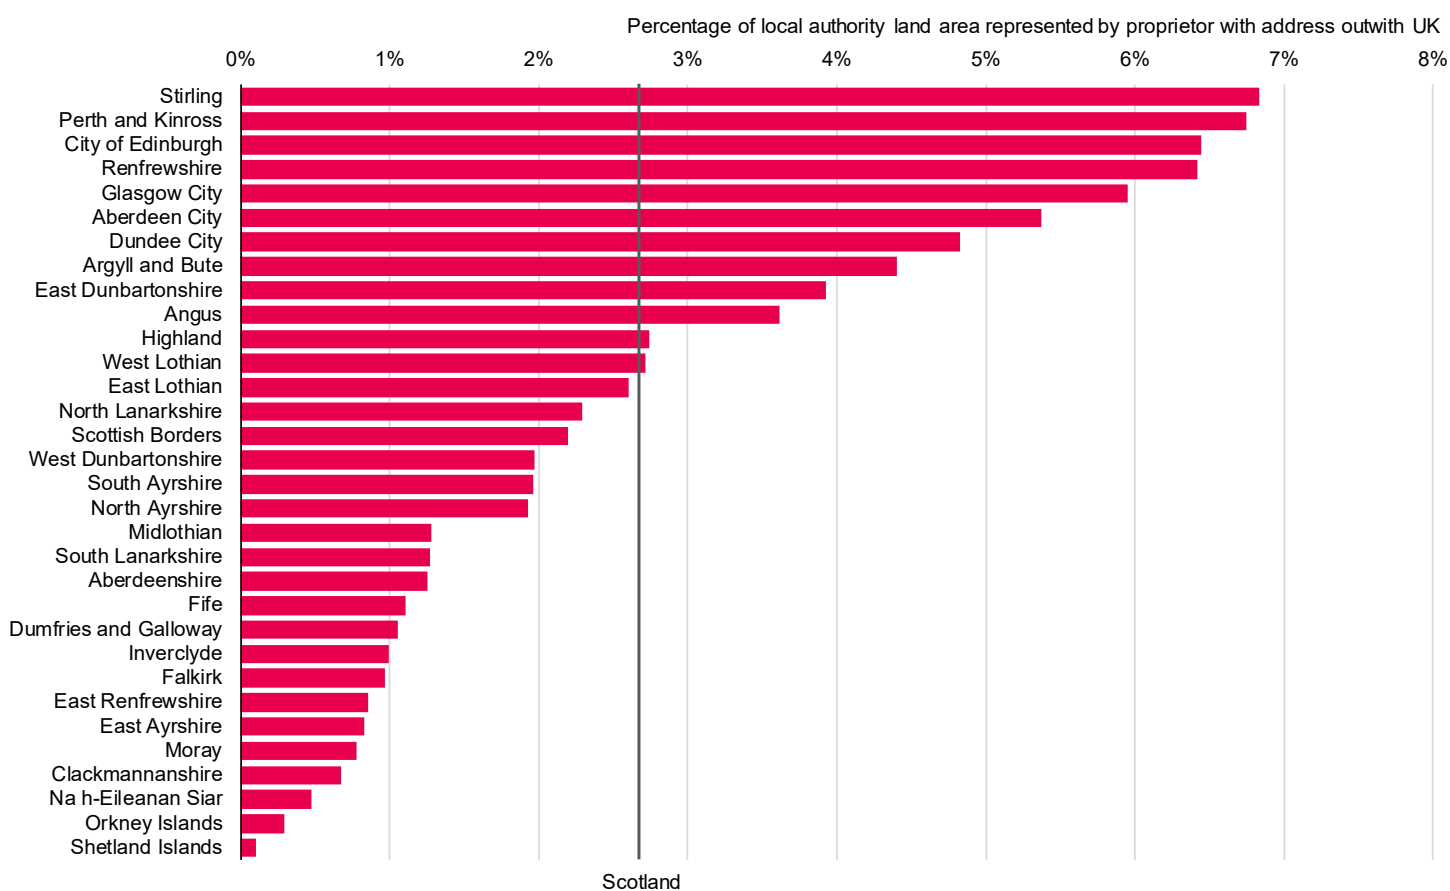

Out of 25,071 outwith UK titles, 24,994 titles were included for analysis. Overall, outwith UK titles represented 2.7% of Scotland's land area. Chart 8 shows the percentage of local authority land area represented by outwith UK titles.

The top three local authorities with the highest percentage of its land area represented by outwith UK titles were Stirling, Perth and Kinross and City of Edinburgh.

The bottom three local authorities were Shetland Islands, Orkney Islands and Na h-Eileanan Siar, all local authorities with very low number of titles overall (see table 9 of the online spreadsheet tables for background data).

### Chart 8: Titles outwith UK represented 2.7% of Scotland's land area

Percentage of local authority land area in Scotland represented by proprietor with address outwith UK as at 31 December 2019

# Background, quality and methodology

## Background

Registers of Scotland (RoS) is the non-ministerial government department responsible for maintaining 20 public registers. These relate to land, property and other legal documents.

RoS collects administrative data in the process of fulfilling the Keeper of the Registers of Scotland's (the Keeper) statutory duties to manage, control and maintain the various public registers under RoS' remit.

RoS' main registers are the General Register of Sasines and the Land Register of Scotland, which both record ownership and other interests related to land and property in Scotland.

The contents of the Sasines Register, which comprises a chronological list of deeds, are steadily being moved across to the Land Register through the Land Register Completion programme (planned for completion by 2024), which was introduced in 1981 and currently (as at 31 December 2019) accounts for 1.80 million registered titles in Scotland. The Land Register is based on the Ordnance Survey map and contains plans of registered properties, providing property owners with a state-backed guarantee of title.

RoS records the legal owner of all land and property types in Scotland, including residential and commercial properties, whether held by an individual, a company or any other legal entity, and regardless of whether that company has been registered in the UK or not.

Since December 2014, where the legal owner is a company outwith UK, the register has recorded the country or territory where the company was incorporated. This information may also have been recorded prior to that date if it was included in the application for registration, but this was on a voluntary basis.

The data is submitted to RoS via standard land register application forms, deeds and accompanying plans (if required). It is used to maintain an open and public property register clearly showing the details for each title registered within and its corresponding spatial extent on the cadastral map.

Information about individual registered titles can already be accessed by the public. There are various online services such as [ScotLIS](#), Scotland's Land Information Service, allows easy access for everyone to a wide range of land and property information. [Customer Services](#) are available for any other needs, such as searching the Land Register and Sasines Register, or getting copies of deeds registered in the registers.

## Data used in this release

The tables accompanying this release are available [here](#). The [Country of Origin Company Report](#) – a dataset containing information about all properties owned or leased in Scotland by companies outwith UK – has also been updated and is available to purchase. This dataset only includes details of companies with an address that was outwith UK, and does not include details of individuals, trustees, limited partnerships, other unincorporated bodies, mixed ownership/tenancy, or unclassified titles.

## Revision policy

The statistics presented here are a snapshot of the Land Register as at 31 December 2019. Annual snapshots are subject to changes made in the live Land Register database. Further information on our general revision policy and how we compile statistics at RoS can be found [here](#).

## Methodology

The statistics in this release are based on a snapshot (a stock picture) of registered titles in the Land Register as at 31 December 2019 (1,799,483 titles). Titles include owners and tenants under long-term commercial leases. Titles that were pending registration on the date of extraction or titles from the Sasines Register are not included.

Each unique title is allocated to one location category only based on the supplied address of the proprietor at the time of registration with RoS. There are five possible location categories that a title could be allocated to based on the town/county/country field of the supplied address: Scotland, England, Wales, Northern Ireland and outwith UK.

Where a title is shared by more than one owner/tenant, those with a non-UK element are allocated to the outwith UK category. Where there is no outwith UK element, the title is allocated to Scotland, England, Wales or Northern Ireland in that order according to the countries represented in the owners'/tenants' addresses, e.g. if Scotland is not represented, but England and Wales are then it will be allocated to England, etc.

Any title within the outwith UK category that includes more than one proprietor with an outwith UK address has been classified to the first outwith UK address listed on the title, e.g. if there were two proprietors, the first from France and the other from Italy, the title would be classified to France.

Any title that includes five or more proprietors where at least one has an outwith UK address is excluded from the analysis to avoid misrepresentation (e.g. to avoid skew from titles with one small interest held by an outwith UK proprietor owned jointly with proprietors based in Scotland).

New registrations and certain changes to existing registrations over the previous 12 months are reviewed and incorporated to present the latest snapshot. If, as part of this review, a title cannot be classified to a geographic location then it is placed in the pot of titles where the proprietor address is unable to be classified. This pot will also include those titles that cannot be classified to a geographic location when the data is initially extracted from the Land Register for the snapshot as at 31 December 2019.

The outwith UK titles were then further classified by type of proprietor, interest, local authority, land classification, urban rural classification and area (further information provided below). The maps shown in figure 2 were made with [Natural Earth](#) (free vector and raster map data).

#### *Land use classification*

The land use classification is provided by the submitting agent on the RoS application form when an application for registration is submitted. Classification is made on the primary land use of the plot of land. Further information on the six land use classes can be found [here](#).

#### *Urban rural classification*

The Scottish Government urban rural classification 2016<sup>6</sup> was attached to all titles with a proprietor address outwith the UK using the 2-fold classification as shown in table 4.

**Table 4: Scottish Government urban rural 2-fold classification 2016**

Classification	Class name	Description
2-fold	Urban areas	Settlements of 3,000 or more people
	Rural areas	Areas with a population of less than 3,000 people

<sup>6</sup> Scottish Government urban rural classification 2016:  
<https://www.gov.scot/publications/scottish-government-urban-rural-classification-2016/pages/2/>

The urban rural classification given to each title was calculated by overlaying the title seed point (a point marker used to identify the position of a Land Register title on the Ordnance Survey base map) with the Scottish Government's urban rural classification 2016. Each seed point was classified with the values of the 2-fold classification extracted from the underlying urban rural classification polygon. Further information on the Scottish Government's urban rural classification is available [here](#). Scottish Government figures were used for the urban land area of each local authority<sup>7</sup>.

#### *Titles outwith UK by area (and further information on experimental statistics status)*

The area of each outwith UK title is calculated using RoS Geographic Information System (GIS) instead of the area information submitted during the registration process. The title polygons were retrieved for each outwith UK title and dissolved/aggregated the area extent by local authority to calculate area totals for each local authority as at 31 December 2019. The total land area for each local authority was calculated using RoS GIS.

A polygon is a closed geometric shape, which represents the mapped extent and location of a title, or part of a title, in the Land Register. In the Land Register, the polygons which make up a title can overlap with each other or with the polygons which make up other titles.

The right associated with each title polygon can only be determined by analysing text descriptions submitted during the registration process. The area referred to relates to all polygons (including those that are generated through rights) associated with the title rather than just ownership only, a limitation of the analysis. A title could include a bundle of rights, not just ownership rights but also other rights such as access rights. This is a result of the legacy spatial data model where the right associated with each title polygon can only be determined by referring to the subject's description. All polygons associated with each title is used in the analysis, rather than trying to isolate only ownership.

There were a small number of titles where the polygon referring to rights straddled local authority boundaries (typically an access road). In these cases, the shared polygon is counted twice, which leads to a small coverage overestimate. In addition, due to the way some types of properties are mapped in two dimensions, it is not always possible to calculate the exact area of ownership even where the polygons which delineates ownership is identified. For example, for flatted properties, the entire building footprint is mapped for each title contained within the building.

The experimental statistics label has been used for these statistics because overall they remain subject to quality testing to meet user needs. Specifically, the method used to calculate the area of the outwith UK title is being tested by statisticians and GIS analysts at RoS and subject to further evaluation given the known limitations (particularly around isolating the area of ownership right). These methodological limitations, the testing and development, and the Land Register not yet being complete has meant that the experimental label has been used for this new output. The experimental statistics label will be reviewed in time for publishing the report next year. Further information on experimental statistics is available [here](#).

---

## Quality

The data used to produce this report is extracted from the Land Register, which is created from the information provided within applications for registration. The risk of inaccurate data being submitted, and of inaccuracies being created by errors in the land registration process, is inherent but is mitigated by:

- checks done by solicitors
- pre-application checks and reports provided by RoS prior to solicitors submitting applications
- RoS registration officers conducting registration checks
- RoS Quality Team undertaking quality checks
- RoS Land & Property Data Team undertaking quality assurance on the data

Both the Land Registration etc. (Scotland) Act 2012<sup>8</sup> – which superseded the Land Registration Act (Scotland) 1979<sup>9</sup> on 8 December 2014 – and the Land Reform (Scotland) Act 2016<sup>10</sup> impose statutory duties on the Keeper which govern the role RoS holds within the Scottish legal and economic framework.

One of the most significant changes in the approach to land registration made following the implementation of the Land Registration etc. (Scotland) Act 2012 was to put the main responsibility of the accuracy of data submitted to RoS within the remit of the submitting agent (usually the solicitor acting on behalf of the purchaser) rather than the Keeper. This provides increased reliability on the quality of data we can extract from the documents submitted for registration in the Land Register since these agents have a greater responsibility to ensure the integrity of the register.

Rules were applied to standardise the naming conventions within the outwith UK data. This was required primarily because of the different versions of country names provided by submitting agents within their applications for registration and because of spelling errors. In order to rectify this, country names were standardised to UN naming conventions, and rules were created around other common variations. For example, references to 'Dubai' or 'Abu Dhabi' in the country field were changed to United Arab Emirates, and references to the 'Channel Islands' were changed to the individual island name.

The focus of this release is on outwith UK titles and as such this category has the higher level of quality assurance. Notwithstanding the practicalities of quality assuring a very large number of titles, the UK-based titles receive no additional quality checks after they have been extracted from the Land Register (apart from new registrations and changes to existing registrations received over the previous 12 months). Placement in a UK-based pot is therefore dependent on the information received by RoS at the time of registration, in particular the entries in the relevant address fields. This information, as outlined above, is subject to various checks before extraction but overall the UK-based title information as shown in table 1 (location of proprietor address) has a lower level quality assurance than that attached to the outwith UK title information.

Due to technical and legal issues, some titles within the Scotland category may have a proprietor whose address at the time of registration was outwith the UK, but have not been identified as such (for example, titles registered in favour of companies before December 2014 when the country of incorporation was only provided on a voluntary basis).

---

<sup>8</sup> Land Registration etc. (Scotland) Act 2012: [www.legislation.gov.uk/asp/2012/5/contents](http://www.legislation.gov.uk/asp/2012/5/contents)

<sup>9</sup> Land Registration (Scotland) Act 1979: [www.legislation.gov.uk/ukpga/1979/33](http://www.legislation.gov.uk/ukpga/1979/33)

<sup>10</sup> Land Reform (Scotland) Act 2016: [www.legislation.gov.uk/asp/2016/18/contents/enacted](http://www.legislation.gov.uk/asp/2016/18/contents/enacted)

The Land and Property Titles in Scotland by Country of Origin statistical release was first published in March 2018 (data as at 31 December 2017). In that release there were around 230,000 unclassified titles, accounting for 13% of all titles registered with a proprietor address. For the current and previous snapshot (data as at 31 December 2018 and 2019) the number of unclassified titles has fallen to around 3.0% of total registered titles in the Land Register. The increase in the number of unclassified titles from last year's snapshot is due to the Land Register being a live administrative database and therefore dependent on changes over the previous 12 month (see table 5).

**Table 5: Location of proprietor address for registered Land Register titles as at 31 December 2017, 31 December 2018 and 31 December 2019**

	As at 31 December 2017			As at 31 December 2018			As at 31 December 2019
